■ DEFINING CHARACTERISTICS

Stellar® CDT™ Equipped

The Stellar CDT equipped cranes will engage and communicate with the crane operator by using multiple sensory indicators when approaching maximum capacity. This will include the use of colored LED lights and pulsating vibrations on the handheld remote. The Stellar CDT control system will also allow the operator to go into a boost mode and operate at 118% of its normal operating capacity for a short period of time.

Remote Control

Stellar Industries was the first U.S. manufacturer to include the state-of-the-art fully proportional multi-functional remote control as a standard feature. The radio remote incorporates a variable speed trigger that allows the operators to feather the crane with precise control. Additionally, the radio remote control handle features engine start/stop functions, compressor on/off, engine speed controls, and an emergency shut-off. It also has LED lights and the ability to vibrate to indicate capacities.

Planetary Drive Winch System

To maximize winch speed, Stellar Industries has incorporated a planetary drive winch system with line speeds up to 60-ft/min (18.29 m), giving the 7621 cranes over twice the speed of competitors with worm drive winches. In addition to speed, the planetary winch also provides mechanical and hydraulic breaks for added security.

Hexagonal Boom Design

Hexagonal booms are stronger and greatly reduce boom flex and side to side movement.

Greaseless Bushings

Maintenance free greaseless bushings.

Stainless Steel Pivot Pins

Lower maintenance and extend life.

21' and 28'6" of Hydraulic Reach

2-stage hydraulic extensions. No manual extensions.

Dual Acting Counter Balance Valves

Integrated into cylinders.

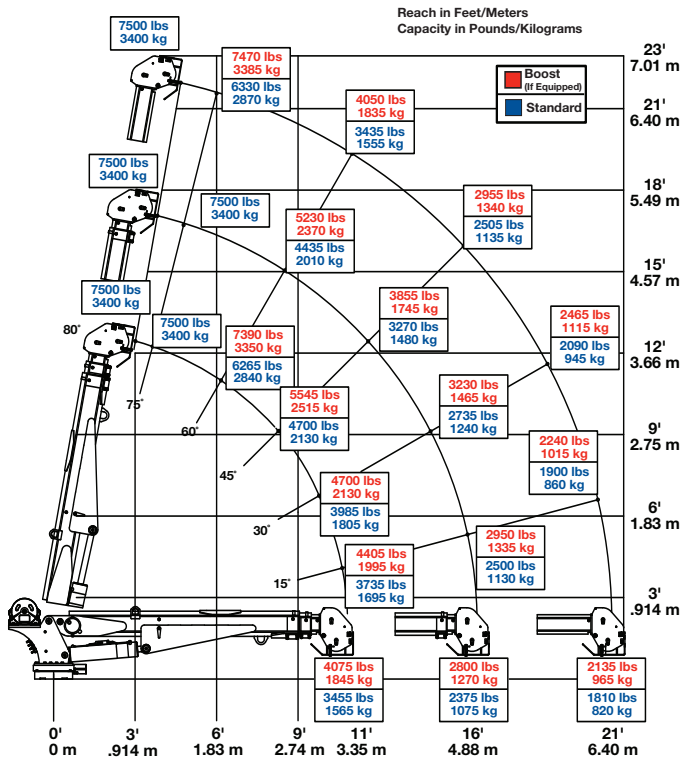

Flip Sheave Standard

Anti Two-Block Device

NOTE: All Stellar cranes meet ANSI B30.5 and OSHA 1910.180 specifications.
Specifications subject to change without notification.
